

Access Over 220,000 Spectra.

All the infrared data you've always wanted from the World Leader in IR Informatics. With HaveItAll® IR, you can access the world's largest infrared spectral collection of over 220,000 spectra of pure organic and commercial compounds all from one CD or via a secure web connection. And because it's Bio-Rad data, you know it's high-quality. Combined with a choice of annual license or transactional pricing, HaveItAll IR is revolutionizing the way infrared spectra are searched.

Solutions for all those who deal with infrared.

HaveItAll IR is extremely useful when trying to identify or classify unknown spectra. Whether you need access to polymers, pure organics, inorganics, organometallics, or industrial compounds within application areas such as Pharmaceuticals, Forensics, Material Sciences, and Academia, you can be sure that this collection will meet your needs. HaveItAll IR also includes Near IR databases, spectra from analytical techniques such as vapor phase and ATR and three databases with direct links to the *NIOSH Pocket Guide to Chemical Hazards*.

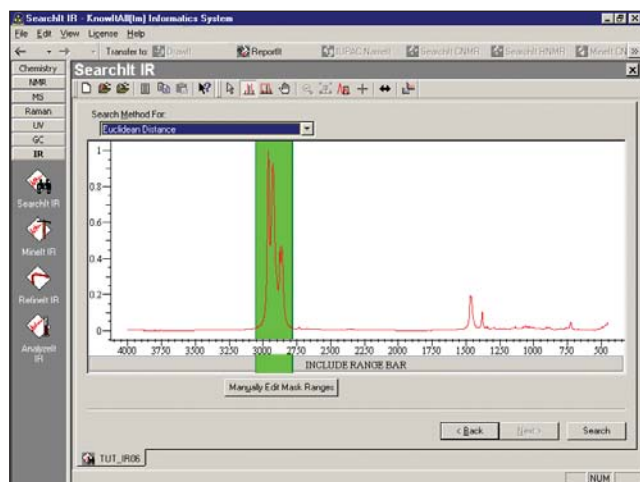

The Highest-Quality Infrared Data Available Today!

Bio-Rad offers the highest quality data on the market. That's because all of the HaveItAll IR data has been processed according to the Sadler Data Review Protocol to provide you with the highest standard available in spectral data today. These rigorous qualifying procedures start at data acquisition and continue throughout the database development process.

Every effort is made to maintain our protocol's high standard of accuracy before placing a spectrum in a collection. This data is tested in our laboratories by certified professionals with extensive training in spectroscopy and validated by outside consultants. Our databases include the following features:

- Chemical and Physical Properties Listed
- Chemical Structures Included
- Chemical Composition Defined
- Sampling Technique Listed
- Databases Created Specifically for Searching
- Databases Authenticated by Independent Consultants

Priced to Fit Your Needs.

For those who search often...unlimited access. Bio-Rad offers unlimited access to over 220,000 spectra for one year. This annual license allows you to use the full power of the KnowItAll Informatix System's search algorithms to not only perform exact identifications, but also to classify and characterize unknown materials when an exact chemical match does not appear in the database. You can use peak searching and substructure searching, combined with limited-range spectral searching to aid in the identification of spectral regions that correlate the unknown material with known reference materials or do a text search to see examples of a specific classification.

For those who search occasionally...pay as you go. Bio-Rad also offers transactional access to the HavelItAll IR data using pre-paid electronic Hit List Keys. With this option, you have *unlimited searching* capability. Then, once you have a good match, you can use one of your pre-paid electronic Hit List Keys to unlock the entire hit list and view all the available information for the records in that hit list, such as spectra, names, properties, and structure.

HavelItAll® IR Includes the Following Databases:

- Adhesives and Sealants
- Adhesives and Sealants (Subset A)
- ATR of Polymers
- Automobile Paint Chips
- Basic Monomers and Polymers, Vol. I (Unmodified)
- Basic Monomers and Polymers, Vol. II (Unmodified)
- Basic Surfactants
- Coating Chemicals
- Commonly Abused Drugs (Acid-Base)
- Condensed Phase IR Standards
- Controlled Pyrolyzates of Polymers
- Demo Database
- Dyes
- Dyes, Pigment and Stains
- Electric Power Plant Materials
- Epoxy Resins, Curing Agents and Additives
- Fats, Waxes and Derivatives
- Fibers and Textile Chemicals
- Fibers by Microscope
- Flame Retardants
- Flavors, Fragrances and Oils
- Food Additives
- Gases and Vapors
- Georgia State Crime Lab
- Hummel Defined Polymers
- Hummel Defined Polymers, Basic Collection
- Hummel Industrial Polymers
- Hummel Industrial Polymers, Polymers
- Hummel Industrial Polymers, Monomers
- Hummel Industrial Polymers, Additives
- Hummel Surfactants
- Hummel | Sadtler Polymers
- Industrial Chemicals, FT-IR, Basic Organic Compounds
- Industrial Chemicals, FT-IR, Pure Organic Compounds
- Inorganics
- Inorganics, Subset A Intermediates (Industrial Quality)
- Intermediates (Unblended)
- Lubricant Additives
- Lubricants
- Merck | Sadtler
- Minerals and Clays
- Monomers and Polymers (Comprehensive)
- Monomers and Polymers Vol. 1 (Modified)
- Monomers and Polymers Vol. 2 (Modified)
- Near IR Spectra Collection of Common Organic Compounds
- NIOSH Pocket Guide for Chemical Hazards (ATR, IR & VP)
- Organometallics
- Organosilicons
- Pesticides and Agricultural Chemicals
- Petroleum Chemicals
- Pharmaceuticals
- Plasticizers
- Polymer Additives
- Polyols
- Prepared and Prescription Drugs
- Priority Pollutants
- Rubber Chemicals
- Sadtler EPA Vapor Phase
- Sadtler Reference Database of Pure Organic Compounds
- Sadtler | Scholl Polymer Processing Chemicals
- Select Standards
- Select Vapor Phase
- Selected IR Reference Database
- Solvents (Industrial Quality)
- Solvents (Unblended)
- Solvents by ATR
- Solvents by Vapor Phase
- Steroids
- Surfactants (Comprehensive)
- Surfactants, Vol. 1
- Surfactants, Vol. 2
- Tutorial Database
- University Standards
- Vapor Phase IR Standards (Comprehensive)
- Water Treatment Chemicals

HavelItAll IR also includes direct links to the *NIOSH Pocket Guide to Chemical Hazards* from the National Institute for Occupational Safety and Health of the United States Centers for Disease Control and Prevention.

Minimum System Requirements: Windows-compatible PC, CD-ROM Drive, Windows 2000, Windows XP Home, or Windows XP Professional operating systems, Pentium III (or equivalent) processor, 128 MB of RAM, 100 MB of free hard disk space (Additional disk space required for HavelItAll databases.)
